**Subject:** RE: Solvay n,m compounds

I wondered and that's why I specified.

This is a very detail rich project! In a densely populated area.

Actually Jon I think we have our labels set up differently, which would be good to suss out before tomorrow.

I have (n,m) as (propyl,ethyl) due to the ordering when you read left-to-right on the structure. So our (1,0) is your (0,1). We are seeing the same major components.

Great stuff! Thanks.

## Ex. 5 Deliberative Process (DP)

Maybe we ought to talk about whether the slides should be combined or just two separate presentations separated by sample media for now.

Thanks Mark. I don't have Chems sketch. Is there another software that opens the image?

If not, I have the original Wang et al. image you found in there. Which would do for now.
